

DIVYA ASNORA

Frontend Developer | MERN Stack | React.js | JavaScript

+91-8755671602 | divyaasnora25@gmail.com | linkedin.com/in/divyaasnora | github.com/divyaasnora | Noida, India

PROFESSIONAL SUMMARY

Motivated Frontend Developer and MCA graduate (8.45 CGPA) from Galgotias University with hands-on experience building responsive, scalable web applications using React.js, Node.js, and the MERN stack. Currently working as a Software Developer at Varisis Advanced Engineering Pvt. Ltd., developing a real-time Command and Control (C2C) surveillance platform with features including live camera monitoring, offline/online status detection, real-time alarms, video recording, snapshot capture, motion detection, and AI-based analytics. Proficient in JavaScript (ES6+), Redux, REST API integration, Socket.IO, and Agile development. Adept at delivering high-performance, user-centric interfaces with clean and maintainable code.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, SQL

Frontend: React.js, Next.js, Redux, Tailwind CSS, .net ,Responsive Web Design, Figma

Backend: Node.js, Express.js, Socket.IO, REST API Development & Integration

Database: MongoDB, MySQL

Tools & Platforms: Git, GitHub, VS Code, Postman, MySQL Workbench, LeetCode, Firebase

WORK EXPERIENCE

Software Developer | Varisis Advanced Engineering Pvt. Ltd. | Noida, India 06/2025 – Present

- Built a Command and Control (C2C) surveillance system with real-time online/offline detection for 100+ cameras, displaying live status with under 2-second refresh latency using Socket.IO and REST APIs.
- Developed a real-time alarm management module that captures, categorizes, and displays triggered alerts from connected cameras, enabling rapid incident response across 3 departments.
- Integrated live video streaming into the dashboard using React.js, enabling operators to monitor real-time camera feeds and replay recorded footage directly from the UI.
- Implemented snapshot capture functionality allowing users to take and download still frames from live or recorded video streams at any point in time.
- Built a motion detection feature that processes camera event data and visually highlights activity zones on the dashboard, reducing manual monitoring effort significantly.
- Integrated an AI-based analytics module surfacing intelligent insights such as object detection events and behavioral anomalies from camera feeds into the monitoring interface.

PROJECTS

Real-Time Chat Application | MongoDB, Express.js, React.js, Node.js, Socket.IO

- Architected a live messaging platform using the MERN stack with Socket.IO, achieving message delivery in under 100ms for concurrent users.
- Implemented JWT-based authentication and encrypted message storage in MongoDB, supporting simultaneous user sessions securely.
- Delivered a fully responsive UI compatible across browsers, reducing reported UI issues to zero during testing.

Amazon Clone (2025) | React.js, Node.js, MySQL, Redux, Firebase

- Developed a full-stack e-commerce application with product listing, search, cart, and checkout handling mock product records.
- Configured Firebase authentication and Redux for global state management, reducing cart-related state errors.
- Developed 10+ REST API endpoints via Node.js for product, user, and order management with MySQL as the data layer.

Flight Booking System (2025) | React.js, Node.js, Express.js, MySQL, Nodemailer, Razorpay

- Built an end-to-end flight booking web application where users search flights, select seats, make payments, and receive e-tickets via email — using React.js for the frontend and Node.js/Express.js for the backend.
- Designed a normalized MySQL database schema storing passenger details, flight numbers, seat assignments, meal preferences, and booking status, ensuring real-time reflection of every confirmed booking.
- Integrated Razorpay payment gateway for secure ticket checkout and used Nodemailer to automatically dispatch HTML e-tickets containing passenger name, flight number, seat, and food preference to the user's email upon successful payment.

Portfolio Website (April 2025) | *HTML, CSS, JavaScript, React.js*

- Launched a professional portfolio site achieving a 95+ Lighthouse performance score and full mobile responsiveness.
- Showcased 6+ projects and certifications, enabling recruiters to explore work samples directly from the site.

EDUCATION

- **Master of Computer Applications (MCA)** – Galgotias University | CGPA: 8.45 / 10 | 08/2023 – 08/2025
- **Bachelor of Science (BSc)** – Kumaun University | 75% | 08/2020 – 08/2023
- **Class 12 (PCM)** – M.P.H.I.C School | 89.4% | 08/2019 – 08/2020

CERTIFICATIONS

- Full Stack Developer Virtual Internship (Jan 2025 – March 2025)
- Frontend Development Certification (Aug 2024)
- The Complete Java Bootcamp (April 2024 – May 2024)

KEY STRENGTHS

Soft Skills: Strong verbal communication, leadership, team collaboration, and presentation skills

Problem Solving: Active on LeetCode with consistent practice in Data Structures & Algorithms (DSA)

Self-Learning: Proactively upskilled through online certifications and hands-on project work
